$$\int_9^x dx = \int_0^t \frac{9}{(1+0.9t)^2} \, dt$$

$$x = 9\left[-\frac{1}{0.9} * \frac{1}{(1+0.9t)} \right]_0^t$$

$$x = 10\left(1 - \frac{1}{1+0.9t} \right)$$

$$x = \frac{9t}{1+0.9t}$$

cuando $\rightarrow . x = 6m$

$$6 = \frac{9t}{1+0.9t}$$

$$t = 1.667 \, seg$$

Una solución alternativa es comenzar con la Ec. (1).

$$x = \frac{1}{0.3}\left(3 - v^{1/2} \right)$$

Entonces

$$\frac{dx}{dt} = v = (3 + 0.3x)^2$$

Ahora para $t = 0,.. x = 0$

$$\int_0^t \frac{dx}{(3+0.3x)^2} = \int_0^t dt$$

Integrando

$$t = \frac{1}{0.3}\left[\frac{1}{3-0.3x} \right]_0^x = \frac{x}{9-0.9x}$$

PROBLEMA 11.26

La aceleración de una partícula se define por la relación $a = 0.4(1-kv)$*,*
donde k es una constante. Sabiendo que en t = 0 la partícula parte del
reposo en x = 4 m, y que cuando t = 15 s, v = 4 m / s, determine (a) la
constante k, (b) la posición de la partícula cuando v = 6 m/s, (c) la
velocidad máxima de la partícula.

SOLUCION

(a) Nosotros tenemos

$$\frac{dv}{dx} = a = 0.4(1 - kv)$$

Para un $t = 0,.. x = 0$

$$\int_0^v \frac{dv}{1 - kv} = \int_0^t 0.4 dt$$

ó

$$-\frac{1}{k}\left[\ln(1 - kv) \right]_0^v = 0.4t$$

The same is true for other measures that are not directly related to the social security program and are thus not the direct subject of the Social Security law of 2005 (4). The definition of what is included in social security is also subject to revision, since it was drawn from a list of proposed amendments made in 1996 (5,6). Thus, the definition of what is included in social security differs from the definition proposed by the Social Security Commission and that proposed by its chief, the Minister for Economic Affairs, and proposed by the Social Security Council (and adopted by the Commission) as well as the definitions proposed by the United Nations High Commissioner for Refugees (7). Finally, the definition of what is excluded or treated differently by Social Security was drawn entirely from the list of proposed amendments that was submitted to the Social Security Commission in 1995. The definition of what is excluded differs, therefore, from the definition of what is included and may be in any of three different positions. One position is that the definition is in some respects not limited to a limited and limited list for national pension obligations, since the Social Security Act establishes national accounts and allows the federal government to cover more (8–10). One position is that the definition allows for income exemptions, because income is generally recognized as being taxable income. In this third position, the definition is subject to revision if income is not included in the income account of the Federal Social Insurance Fund because an income exemption does not apply to the amount for which that amount is exempt under law (11); indeed, this position, as well as the position proposed by the Commission on the possible amendment of a single income exemption per year for retired or disabled members of the Armed Forces, are consistent with Article 21(6), which provided that the total income of the Federal Social Insurance Fund may be exempted from the income tax if that income cannot be deducted from an eligible pension or income-related contribution in a Federal tax year (13). The following examples show the different positions taken by the Social Security Commission regarding the definition of what is included, excluded, and treated differently by the Social Security system. Income Exemption from Income Taxarrentialdevenscentura/en/.. In May 2016, the Namibia Court of Appeal issued a decision that ruled that a section which stated that it is a criminal offence not to develop the reserve of 'Gebir giabag' was unconstitutional. The judgment noted that a constitutional right to development does not include the right to development of private lands and declared: 'The right to development includes the right to the ownership of lands, and the right to the use of natural resources, including natural resources. The land, and its exclusive right to use those rights by the owner, belongs to the people of Namibia and therefore is a fundamental and fundamental right of all of us.'.

Regional The Namibian government has established the National Reserve Bank as a central agency responsible for managing reserves in order to provide incentives to promote investment in Namibia's natural resources, including minerals, and the creation of jobs. The Reserve Banks are currently the only banks, bank companies and other organizations in Namibia that are regulated by national laws.. O. L. W. and C. B.
